Other

Product / Application	BIS (IS)	ISO	ASTM	DIN	Other Standards
Rubber Hawai Chappal	IS 10702:2023;IS 11544 (Specification for rubber hawai chappal governing material requirements, dimensions, and manufacturing guidelines);IS 3400 (Part 1) (Methods of test for vulcanized rubbers to determine tensile strength and elongation at break of the microcellular rubber sheet);IS 3400 (Part 2) (Methods of test for vulcanized rubbers to measure the hardness of the footwear sole using a durometer);IS 3400 (Part 10) (Methods of test for vulcanized rubbers to evaluate the compression set under constant deflection);	ISO 20871:2018 (outsole abrasion resistance);ISO 20872:2018 (outsole tear strength);ISO 37:2024 (tensile stress-strain of rubber);ISO 48-4:2018 (hardness of rubber);ISO 815-1:2019 (compression set);ISO 188:2023 (accelerated ageing)	ASTM D412 (rubber tensile properties); ASTM D624 (tear strength); ASTM D2240 (hardness); ASTM D395 (compression set); ASTM D573 (accelerated aging); ASTM D471 (effect of liquids, where applicable); ASTM D1056 (Standard specification for flexible cellular materials to classify and test the microcellular rubber compound density);	-	-
Rubber microcellular sheets for soles and heels	IS 6664:1992 (Microcellular Rubber Sheets for Soles and Heels)	ISO 3386-1:2010 (compression stress-strain of flexible cellular polymeric materials);ISO 37:2024 (tensile properties of rubber);ISO 48-4:2018 (hardness);ISO 815-1:2019 (compression set);ISO 188:2023 (accelerated ageing)	ASTM D3574 (flexible cellular materials — test methods); ASTM D412 (rubber tensile properties, where applicable); ASTM D624 (tear strength); ASTM D2240 (hardness); ASTM D395 (compression set)	-	-
