Smart Textiles

Product / Application	BIS (IS)	ISO	ASTM	DIN	Other Standards
Conductive Fabrics; Heated Fabrics; Sensor Textiles; RFID Textiles; UV Protective Fabrics; Antimicrobial Fabrics; Phase Change Textiles; Wearable Electronics Textiles	IS 15351 (Technical Textile Applications); Relevant BIS standards for Smart/Functional Textiles, where applicable,IS 8140; IS 2414; IS 4832; IS 15570; IS 6359	ISO 2076 (Textiles — Man-made Fibres — Generic Names); ISO 13688 (Protective Clothing — General Requirements, where applicable); ISO 10993-1 (Biological Evaluation of Medical Devices, where wearable medical textiles are applicable),ISO 2286; ISO 4674; ISO 2411; ISO 3011; ISO 5470; ISO 5978	ASTM D257 (DC Resistance or Conductance of Insulating Materials); ASTM D4496 (DC Resistance or Conductance of Moderately Conductive Materials); ASTM E2149 (Antimicrobial Activity of Immobilized Antimicrobial Agents); ASTM G154 (UV Exposure of Nonmetallic Materials),ASTM D3775; ASTM D4851; ASTM D5446	DIN EN 61340-2-3 (Determination of Resistance and Resistivity of Materials); DIN EN ISO 20471 (High Visibility Clothing, where applicable); DIN EN ISO 105-B02 (Colour Fastness to Light); DIN EN ISO 13934-1 (Tensile Properties of Fabrics)	IEC 61340 Series (Electrostatic Control); UL 94 (Flammability Classification); FCC Requirements (RFID/Wireless Textile Applications); OEKO-TEX Standard 100
